International Community Association Managers Day

Community Associations Institute (CAI) is proud to celebrate International Community Association Managers Day on June 13. This day is dedicated to more than 55,000 community association managers in the U.S. and thousands more worldwide. Community association managers are the professional backbone of the condominium communities and homeowners associations that they serve, providing the skills and expertise that are essential to successful operations and governance.

These professionals are knowledgeable in financial management, urban planning, facility maintenance, community development, and volunteer management. Join us as we recognize the tremendous impact that these professionals have on the fastest growing housing model across the globe. Community association managers help make community associations preferred places to call home.
