## What to do now:

- Your bookmarks and notes in the current digital books platform cannot be transferred automatically to the new platform. If you'd like to save them, follow these instructions:

- Log in.
- Click on My Activity.

- Click on My Personalization.
- Click on the individual book(s).
- Click on “Bookmarks” or “Notes” then click “Export.”

- An Excel file will download to your computer. See individual tabs for bookmarks and notes. The list will include the page(s) where the personalization was made, the contents of the note (if created), and the date the personalization was made.
- Save the file and manually transfer when the new platform launches.

**Please note:** Bookmarks and notes have to be exported for each book separately. Highlights will not be exported unless they have a note attached to them.
