#### 1-2:30 p.m.

#### Legal Basis for Plats and Plans for Condominiums and Homeowner Associations

Many community association attorneys are responsible for reviewing plats and plans to ensure compliance with legal requirements. This program explores the common law and statutory basis for what must be shown to meet title requirements and properly define ownership and use rights in condominiums and homeowner associations.

#### Priority Lien Is Under Attack by the Feds and the Big Banks: Case Law and the Future of Super Priority Lien

Twenty-two states and the District of Columbia have adopted legislation that affords community associations priority lien rights for delinquent assessment collection, but the federal government and big banks have attacked these priorities. This session examines the latest court cases and most pressing priority lien rights issues community associations will face from federal agencies, mortgage bankers and their allies. Leave this session knowing what's happening now and how to navigate what lies ahead.

#### Firm Owner/Managing Partner Track:

This track is continuing legal education for practice area managers, managing partners or firm owners to gain expert insight into ensuring the future of a firm or practice area's productivity and success.

#### 1-2:30 p.m.

#### Your Website: Depreciating or Income-Producing Asset?

There are only 24 hours in a day, so where and how you spend those valuable hours is crucial. Just like the benefit of earning passive income, understanding your firm's passive assets is crucial to improving profits and growing your practice. In today's world more and more clients find legal counsel online, and the competition continues to grow. Even if there is a referral, most board members or managers will "check out" the law firm online. Is your firm's primary passive asset, its online presence, ready for this? This session explores: (1) the top three ways to optimize your website so that potential clients find you; (2) proven strategies to convert inquiries on your website into actual clients; and (3) techniques to ensure your website both reflects and distinguishes you. #### Getting Your Association's Electronic Pocket Picked: Cyber and Technology Risks

Risks in the wired world have never been easy to understand much less manage and insure. The electronic exposures to loss typically range from damaged or compromised data, exposure of personally identifiable information and theft of money and property caused by malicious bugs or hacking by unknown predators. In addition, the proliferation of drones and electronic surveillance elevates the possibility of invasion of privacy, and the risks related to the Internet of Things is just emerging. Associations, like the business world, may be becoming so dependent on the wired world that a loss of connectivity may mean the loss of existence. As a result, a number of association insurance agents and professionals are stepping into this cyber and technology risk market with new products and timely technical information.
